TECHNICAL SKILLS

Languages: C++, C, Python, Java, Bash, Go, SQL, JavaScript, TypeScript

Embedded & Systems: Linux, QNX, Git, GTest, Docker, CI/CD, Jenkins, Assembly, Verilog

AI & Edge ML: PyTorch, TensorFlow/TFLite, ONNX, TensorRT, OpenCV, scikit-learn, XGBoost, Hugging Face

Data & Compute: Spark, Hadoop, Databricks, NumPy, Pandas, PostgreSQL, Kubernetes

EXPERIENCE

Data Engineer Intern

May 2026 – Aug. 2026

Scotiabank

Toronto, ON

- Deployed a team-wide **Databricks SQL observability layer** that surfaced **180+ batch failures**, including **100+ critical** and **80+ invalid-load events**, accelerating triage of silent ingestion issues
- Built **Python diagnostics** and shell automation, resolving **30+ ETL failures** across distributed ingestion pipelines

Software Engineer Intern

May 2025 – May 2026

Ericsson

Ottawa, ON

- Re-architected an **AI crash analysis agent** into a **RAG system** using **150+ technical reports**, improving accuracy from **33% to 91%** and deploying it **globally** across **Ericsson's Baseband division**
- Implemented **5G radio configuration flows** across **vDU/RU interfaces**, mapping antenna and spatial parameters across **5 protocol layers** and validating configuration IDs using **C++**
- Built a **RAG chatbot** with **semantic retrieval** over **Cloud RAN documentation**, used by **20+ developers**

Software Engineer Intern

May 2024 – Aug. 2024

BlackBerry

Ottawa, ON

- Engineered a **C++ synthetic sensor** in the **BlackBerry IVY®** cloud to process vehicle telemetry, benchmarking **BlackBerry-wide synthetic-sensor deployments** and improving output accuracy by **40%**
- Trained and deployed a **TensorFlow Lite** model for seat-occupancy in-vehicle detection with **92% precision**, integrating inference into the Android application using **Kotlin**

PROJECTS

Praxis (1st Place Overall / 450+ Participants @ Hack the 6ix + Best Use of QNX) 🏆 | Python, llama.cpp, GGUF

- Built a portable **QNX/Pi 5 motor-rehab system** combining live **IMU tremor detection** with **NV12 camera segmentation**, placing **1st overall** at **Canada's largest summer hackathon**
- Replaced **SmolVLM** with **L2-regularized logistic regression** to classify image-capture validity on-device, cutting latency from **16 s to 0.6 s** at **90% balanced accuracy**
- Fine-tuned **Qwen3.5-4B** with **SFT** and **GRPO** on rehabilitation comparisons to classify longitudinal trends with **92% accuracy** across **38 unseen cases**

Trace (1st Place @ CarletonU Hackathon 2025) 🏆 | JavaScript, Node.js, Express, SQLite

- Built a **geospatial routing layer** over **OSRM** that re-ranked **3+ candidate paths per request** using a **multi-factor spatiotemporal risk-scoring algorithm** to minimize hazard exposure

Brick by Brick (Best Use of Snowflake API / 140+ Participants @ SheHacks 10) 🏆 | Python, Snowflake, Gemini

- Built a **fractional housing investment platform** across **1,000+ Toronto homes**, scoring investment risk with a **Gemini harness** while syncing through the **Snowflake API** in **<300 ms**

EDUCATION

Carleton University

Sep. 2023 – Apr. 2028

Bachelor of Engineering (BEng) in Software Engineering, Co-operative Education

GPA: 3.85/4.0

- Awards:** Dean's Honour List, President's Scholarship (\$12,000)
